

Handbook Of Advanced Methods And Processes In Oxidation Catalysis

Author : Daniel Duprez Fabrizio Cavani / **Category :** Science /
Total Pages : 1036 pages

 [Download Handbook Of Advanced Methods And Processes In Oxidation Catalysis PDF](#)

Summary : Free handbook of advanced methods and processes in oxidation catalysis pdf download - this book offers a comprehensive overview of the most recent developments in both total oxidation and combustion and also in selective oxidation for each topic fundamental aspects are paralleled with industrial applications the book covers oxidation catalysis one of the major areas of industrial chemistry outlining recent achievements current challenges and future opportunities one distinguishing feature of the book is the selection of arguments which are emblematic of current trends in the chemical industry such as miniaturization use of alternative greener oxidants and innovative systems for pollutant abatement topics outlined are described in terms of both catalyst and reaction chemistry and also reactor and process technology contents oxidation of co and hydrocarbons in exhaust gas treatments jacques barbier jr and daniel duprez soot oxidation in particulate filter regeneration junko uchisawa akira obuchi and tetsuya nanba the catalytic oxidation of hydrocarbon volatile organic compounds tomas garcia benjamin solsona and stuart h taylor catalytic oxidation of volatile organic compounds chlorinated hydrocarbons juan r gonz lez-velasco asier aranzabal be at pereda-ayo m pilar gonz lez-marcos and jos a gonz lez-marcos zeolites as alternative catalysts for the oxidation of persistent organic pollutants st phane marie-rose mihaela taralunga xavier chaucherie fran ois nicol emmanuel fiani thomas belin patrick magnoux and j r me mijoin plasma catalysis for volatile organic compounds abatement j christopher whitehead catalytic abatement of volatile organic compounds some industrial applications pascaline tran james m chen and robert j farrauto hydrocarbon processing catalytic combustion and partial oxidation to syngas unni olsbye oxygen activation for fuel cell and electrochemical process applications christophe coutanceau and st ve baranton advanced oxidation processes in water treatment gabriele centi and siglinda perathoner selective oxidation at sabc innovative catalysts and technologies edouard mamedov and khalid karim development of selective oxidation catalysts at clariant gerhard mestl the industrial oxidation of ka oil to adipic acid stefano alini and pierpaolo babini selective oxidation reactions in polynt an overview of processes and catalysts for maleic anhydride mario

novelli maurizio leonardi and carlotta cortelli selective oxidations at eni roberto buzzoni marco ricci stefano rossini and carlo perego selective oxidation in dsm innovative catalysts and technologies paul l alsters jean-marie aubry werner bonrath corinne daguenet michael hans walther jary ulla letinois v ronique nardello-rataj thomas netscher rudy parton jan sch tz jaap van soolinghen johan tinge and bettina w stenberg in situ and operando raman spectroscopy of oxidation catalysts israel e wachs and miguel ba ares infrared spectroscopy in oxidation catalysis guido busca in situ non-vibrational characterization techniques to analyse oxidation catalysts and mechanisms angelika br ckner evgenii kondratenko vita kondratenko j rg radnik and matthias schneider vanadium-phosphorus oxide catalyst for n-butane selective oxidation from catalyst synthesis to the industrial process elisabeth bordes-richards ali shekari and gregory s patience polyoxometalates catalysts for sustainable oxidations and energy applications mauro carraro giulia fiorani andrea sartorel and marcella bonchio supported metal nanoparticles in liquid-phase oxidation reactions nikolaos dimitratos jose a lopez-sanchez and graham j hutchings sustainability trends in homogeneous catalytic oxidations alessandro scarso and giorgio strukul light alkanes oxidation targets reached and current challenges francisco ivars and jos m l pez nieto opportunities for oxidation reactions under supercritical conditions udo armbruster and andreas martin unconventional oxidants for gas-phase oxidations patricio ruiz alejandro karelovic and vicente cort s corber n membrane reactors as tools for improved catalytic oxidation processes miguel men ndez structured catalytic reactors for selective oxidations gianpiero gropi alessandra beretta and enrico tronconi readership researchers from academic laboratories and also from research departments in the chemical industry key features a very good balance between fundamental research and industrial developmentnon-conventional processes e g plasma catalysis and borderline questions such as oxygen activation at electrodes are tackledkeywords catalytic oxidation volatile organic compounds air depollution water depollution plasma catalysis selective catalytic oxidation green oxidantsreviews this book is highly recommended to senior scientists engineers and industrialists as well as to young researchers and students because of its very valuable contents and strong relation with industrial interests jacques c v drine emeritus professor laboratoire de r activit de surface university pierre marie curie the book is aimed at scientists involved in developing processes for the production of different organic chemicals it could be also used for advanced undergraduate or post-graduate level courses in green chemistry and for researchers working in catalysis interested in discovering new applications for different oxidation catalysts jos louis garcia fierro institute of catalysis and petrochemistry csic spain this

book is particularly interesting in that it clearly describes the very diverse applications and importance of oxidation catalysis within the chemical industry the breadth of scope makes it a great resource but also ensures that the reader will only be interested in the detail of some parts of the book johnson matthey technology review

Publisher : World Scientific on 2014-07-24 / **ISBN :** 9781783263349
