Summary : Free pastoralism and development in africa pdf download - once again the horn of africa has been in the headlines and once again the news has been bad drought famine conflict hunger suffering and death the finger of blame has been pointed in numerous directions to the changing climate to environmental degradation to overpopulation to geopolitics and conflict to aid agency failures and more but it is not all disaster and catastrophe many successful development efforts at the margins often remain hidden informal sometimes illegal and rarely in line with standard development prescriptions if we shift our gaze from the capital cities to the regional centres and their hinterlands then a very different perspective emerges these are the places where pastoralists live they have for centuries struggled with drought conflict and famine they are resourceful entrepreneurial and innovative peoples yet they have been ignored and marginalised by the states that control their territory and the development agencies who are supposed to help them this book argues that while we should not ignore the profound difficulties of creating secure livelihoods in the greater horn of africa there is much to be learned from development successes large and small this book will be of great interest to students and scholars with an interest in development studies and human geography with a particular emphasis on africa it will also appeal to development policy-makers and practitioners

Publisher : Routledge on 2013 / **ISBN** : 9780415540711
