Summary : Free in the shadow of illness pdf download - what is it like to live with a child who has a chronic life-threatening disease what impact does the illness have on well siblings in the family myra bluebond-langner suggests that understanding the impact of the illness lies not in identifying deficiencies in the lives of those affected but in appreciating how family members carry on with their lives in the face of the disease s intrusion the private worlds of dying children bluebond-langner s previous book now considered a classic in the field explored the world of terminally ill children in her new book she turns her attention to the lives of those who live in the shadow of chronic illness the parents and well siblings of children who have cystic fibrosis through a series of narrative portraits she draws us into the daily lives of nine families of children at different points in the natural history of the illness--from diagnosis through the terminal phase in these portraits as family members talk about their experiences in their own words we see how parents well siblings and the ill children themselves struggle in different ways to contain the intrusion of the disease into their lives bluebond-langner looks at how parents adjust their priorities and their idea of what constitutes a normal life how they try to balance the needs of other family members while caring for the ill child and how they see the future this context helps us understand how well siblings view the illness and how they relate to their ill sibling and parents since the issues raised are not unique to cystic fibrosis but are common to other chronic and life-threatening illnesses this book will be of interest to all who study care for or live with the seriously ill
