Summary : Free artificial intelligence and knowledge engineering applications a bioinspired approach pdf download - the two-volume set lncs 3561 and lncs 3562 constitute the refereed proceedings of the first international work-conference on the interplay between natural and artificial computation iwinac 2005 held in las palmas canary islands spain in june 2005 the 118 revised papers presented are thematically divided into two volumes the first includes all the contributions mainly related with the methodological conceptual formal and experimental developments in the fields of neurophysiology and cognitive science the second volume collects the papers related with bioinspired programming strategies and all the contributions related with the computational solutions to engineering problems in different application domains

Pusblisher : Springer Science Business Media on 2005-06-13 / **ISBN :** 3540263195
